IMPORTANT

Are you a mortgage and/or consumer loan customer?

Effective September 13, 2024, we will be transitioning from sending coupon books to providing monthly loan statements. This change is being implemented to offer you a more streamlined and convenient way to manage your payments and stay informed about your account details.

VOTE FIRST FEDERAL SAVINGS BANK, YOUR COMMUNITY BANK, FOR ***"BEST BANK"*** AND ***"BEST MORTGAGE LENDING COMPANY"***

Voting begins September 16 and runs through September 30.

Each person may vote once daily.

Bizlink

Business Online Banking (Bizlink) offers a host of features to make your online treasury management fast, easy, and secure.

Online Account Access

- View account details in real time
- eStatements
- Internal transfers
- Export account history in multiple formats
- Stop payment orders on checks
- View check images

ACH Payments and Receivables

- Payroll direct deposits
- Originate ACH payments to and from vendors
- Import ACH-ready files
- Pre-authorize customer payments
- Create templates for recurring ACH transactions

Customizable

- Multi-user and multi-location capabilities
- Tailor system permissions to meet your needs

Wire Transfers

- Submit domestic wire transfers
- Create templates for recurring wire transfers

Added Security

- Dual-control options for added security
- Multi-factor authentication

Contact a Treasury Management Officer for more details at (812) 492-8124.

Zelle[®] is a fast and easy way to:

SEND

Forgot a family member's birthday? Send a gift of money with Zelle.[®]

REQUEST

Ask your roomies for their share of rent -- without the awkwardness.

SPLIT

No need for separate checks -- split the cost of the dinner tab with friends.

TECH SUPPORT SCAMS

You get a phone call, pop-up, or email telling you there's a problem with your computer.

Often, scammers are behind these calls, pop-up messages, and emails. They want to get your money, personal information, or access to your files. This can harm your network, put your data at risk, and damage your business.

HOW THE SCAM WORKS

The scammers may pretend to be from a well-known tech company, such as Microsoft. They use lots of technical terms to convince you that the problems with your computer are real. They may ask you to open some files or run a scan on your computer — and then tell you those files or the scan results show a problem...but there isn't one.

The scammers may then:

Ask you to give them remote access to your computer — which lets them access all information stored on it, and on any network connected to it

Install malware that gives them access to your computer and sensitive data, like user names and passwords

Try to sell you software or repair services that are worthless or available elsewhere for free

Try to enroll you in a worthless computer maintenance or warranty program

Ask you to pay with a credit card or gift card for phony services or services available elsewhere for free

Direct you to websites and ask you to enter credit card, bank account, and other personal information

HOW TO PROTECT YOUR BUSINESS

If a caller says your computer has a problem, hang up. A tech support call you don't expect is a scam — even if the number is local or looks legitimate. These scammers use fake caller ID information to look like local businesses or trusted companies.

If you get a pop-up message to call tech support, ignore it. Some pop-up messages about computer issues are legitimate, but do not call a number or click on a link that appears in a pop-up message warning you of a computer problem.

If you're worried about a virus or other threat, call your security software company directly, using the phone number on its website, the sales receipt, or the product packaging. Or consult a trusted security professional.

Never give someone your password, and don't give remote access to your computer to someone who contacts you unexpectedly.

WHAT TO DO IF YOU'RE SCAMMED

If you shared your password with a scammer, change it on every account that uses this password. Remember to use unique passwords for each account and service. Consider using a password manager.

Get rid of malware. Update or download legitimate security software. Scan your computer, and delete anything the software says is a problem. If you need help, consult a trusted security professional.

If the affected computer is connected to your network, you or a security professional should check the entire network for intrusions.

If you bought bogus services, ask your credit card company to reverse the charges, and check your statement for any charges you didn't approve. Keep checking your credit card statements to make sure the scammer doesn't try to re-charge you every month.

Report the attack right away to the FTC at [FTC.gov/Complaint](https://www.ftc.gov/Complaint).

- Loan Servicing Specialist
- Commercial Support Specialist
- Teller I
- Commercial Credit Analyst

*Positions available as of September 1 and subject to change.

RECIPE OF THE MONTH

Chicken Parmesan

INGREDIENTS

- 1.5 lbs boneless, skinless chicken breasts
- ½ cup whole wheat flour
- 3 large eggs
- 1.5 cups shredded mozzarella
- 1.5 cups marinara sauce

Breading Mixture

- 1 cup whole wheat bread crumbs unseasoned
- ½ cup parmesan cheese
- ¼ teaspoon pepper
- 2 teaspoons dried basil
- 2 teaspoons dried parsley

<https://thecleaneatingcouple.com/baked-chicken-parmesan/>

INSTRUCTIONS

1. Butterfly and pound chicken breasts. To do this, slice the chicken breasts in half lengthwise (like a book!). Place in between plastic wrap and use a meat tenderizer to pound the chicken until it is about ¼ inch thick. This is important and skipping this step will result in undercooked, tough chicken. You should wind up with 6 cutlets.
2. Preheat your oven to 425 and prepare a parchment-lined baking sheet.
3. Set out 3 large shallow bowls.
4. In the first bowl, add whole wheat flour.
5. In the second bowl, crack and whisk eggs.
6. In the third bowl, mix together bread crumbs, parmesan cheese, salt, pepper, dried basil, and dried parsley.
7. Form an assembly line with your bowls. Take your chicken cutlet and cover in flour, then dip in egg, then dip in the bread crumb mixture. You can press gently to make sure the cutlets are coated. Repeat for all cutlets.
8. Place breaded cutlets on a baking sheet. Bake at 425 for 15 minutes, flip the cutlets, and bake for another 15 minutes.
9. After the chicken has been baking for 30 minutes, top each cutlet with about ¼ cup tomato sauce and ¼ cup shredded mozzarella. Return to the oven and set to broil for about 2 minutes until the cheese is melted.
10. Serve over pasta or a salad.
